Dear Andi:

We are writing to you to extend an invitation to join the staff of the Infectious Diseases Society of America Education and Research Foundation on an educational trip to the Centers for Disease Control and Prevention in Atlanta on September 14-15, 2017. The focus of the trip is CDC programs related to global infectious diseases, particularly those related to global HIV and tuberculosis.

The Infectious Diseases Society of America represents more than 11,000 physicians and scientists devoted to patient care, prevention, public health, education, and research in the area of infectious diseases. IDSA members share a passion for protecting and improving the health of individuals and communities in the U.S. and around the globe. Our members lead global HIV, tuberculosis, global health security and other research and response programs dealing with emerging infectious threats.

On this Congressional staff learning trip, participants will learn about the activities and programs relevant to US leadership in global HIV and Tuberculosis including touring laboratories that provide cutting edge support to WHO and laboratories around the world, and the intersection of global HIV and TB with CDC programming responding to antimicrobial resistance and supporting global health security activities. Participants will be provided with budget information about all of these activities and be offered information about how CDC's global AIDS program supports PEPFAR activities aimed at achieving HIV epidemic control in high incidence countries. Participants will have the opportunity to speak with the staff responsible for managing these programs and to appreciate the role they play in protecting and improving domestic health and security.

You will meet with the CDC leadership and will learn about some of the major initiatives of each of the key global programs as well as the synergy and collaboration that exist between them.

The purpose of this trip is to provide unique access and information to support policy analysis and decision-making. This will be a privately funded and organized trip, fully consistent with congressional ethics rules, and the Infectious Diseases Society of America Education and Research Foundation will cover round-trip coach airfare to Atlanta, one night's lodging, meals and local transportation in DC and Atlanta. The current plan is to depart from Washington D.C. on Thursday afternoon, September 14<sup>th</sup> and return to DC by early evening, September 15.

Please contact me to respond to this invitation, to raise any questions, and to garner more detailed information. I can be reached at [clubinski@idsociety.org](mailto:clubinski@idsociety.org) or via telephone at 703-299-5027. We must begin our travel planning, so we would appreciate an expression of interest as soon as possible.

Sincerely,
